GENERAL NOTES re Outings.

Visitors, and members' friends and families are always welcome on outings, but if accommodation is limited (eg possibly on some boat trips), then of course members take preference.

Transport can be arranged for those who haven't their own by ringing the Dive Captain for the particular outing, as early as possible. Likewise, people with transport available can help by letting the Dive Captain know.

It's a wise move to wear a lifejacket on every dive, and on some dives the club specifically requires it; these are - diving from an ocean shoreline, and any diving involving a boat.

To dive deeper than 60 ft on a club outing, members are required to have a "C" Grade Certificate, for obvious reasons.

The nominal tide times given apply to the site of the outing, but these may vary according to the prevailing weather.

Rock-shelf shoreline diving in the ocean is best a low tide; but remember that great care must be taken when waves are sweeping over the rock-shelves because of the resulting, swift, outgoing currents in the gut-ways.
